Historic Resources Survey of Downtown Austin

Old Austin Neighborhood Association

June 26, 2020

Prepared for the Old Austin Neighborhood Association

Prepared by HHM & Associates, Inc.

Austin, Texas

This project was funded in part through a Certified Local Government Grant from the National Park Service, U.S. Department of the Interior, as administered by the Texas Historical Commission.

The contents and opinions, however, do not necessarily reflect the views and policies of the Department of the Interior, nor does the mention of trade names or commercial products constitute endorsement or recommendation by the Department of the Interior.

This program receives Federal funds from the National Park Service. Regulations of the U.S. Department of the Interior strictly prohibit unlawful discrimination in departmental Federally Assisted Programs on the basis of race, color, national origin, age or handicap. Any person who believes he or she has been discriminated against in any program, activity, or facility operated by a recipient of Federal assistance should write to: Director, Equal Opportunity Program, U.S. Department of the Interior, National Park Service, P.O. Box 37127, Washington, D.C. 20013-7127.

1 | Executive Summary

In March 2019, the Old Austin Neighborhood Association (OANA) and the City of Austin received a Certified Local Government (CLG) grant from the Texas Historical Commission to conduct a comprehensive historic resources survey of the area depicted in figure i below. The CLG grant uses funding from the National Park Service, administered at the state level by the Texas Historical Commission. To match the CLG grant funding, OANA received funding from Preservation Austin and private donors. Volunteers with OANA also provided support for research efforts, and consulting firm HHM & Associates, Inc. (HHM) provided *pro bono* labor. HHM is an Austin-based historic preservation consulting firm founded in 1983. This survey updates a city-wide survey completed by HHM in 1984.

In November 2019, the Texas Historical Commission and the City of Austin approved a Research Design and Fieldwork Methodology for the project (*Appendix E*). The approved methodology for the project entailed using a tablet-based survey form to document and evaluate all substantial buildings, structures, sites, landscapes, and objects within the survey area, provided that they were visible from the public right-of-way. Survey efforts were comprehensive and documented all resources regardless of construction date. In November and December 2019, HHM implemented this methodology to survey all above-ground cultural resources within the boundary for this project – including buildings, structures, objects, and sites. HHM professional staff meeting the *Secretary of Interior’s Professional Qualifications Standards* (36 CFR Part 61) then evaluated each identified resource for eligibility for listing in the National Register of Historic Places (NRHP) and/or designation as a local City of Austin landmark or historic district. A summary of these recommendations is presented below in table i. An illustration of the boundaries of recommended historic districts appears below in figure ii, followed by maps illustrating the individual recommendation for each resource (fig. iii) and the contributing or noncontributing status for each resource (fig. iv). The *Survey Results* section within this report provides additional detail, as do the attached appendices.

The recommendations in this report are provided for information-gathering purposes only. No historic designations, zoning changes, or taxing changes are included within the scope of this project. Citizens may opt to implement the recommendations herein, but that process must include grassroots support from property owners. Discussion of potential future implementation of survey recommendations is included within the *Future Recommendations* section of the report.

Table i. Summary of survey findings.

Eligibility Recommendations	No. of Resources
Individual resources previously listed in the NRHP	25
Individual resources recommended for NRHP listing	132
Individual resources with prior Registered Texas Historic Landmark (RTHL), Official Texas Historical Marker (OTHM), or State Antiquities Landmark (SAL) designations	36
Individual resources previously designated as local historic landmarks	60
Individual resources recommended for local historic landmark designation	64
Historic district(s) listed/recommended for NRHP listing	2
<i>Contributing resources within the listed Bremond Block NRHP historic district</i>	13
<i>Contributing resources within the recommended West Downtown NRHP historic district</i>	266
Historic district(s) recommended for local historic district designation	2
<i>Contributing resources within the recommended Bremond Block local historic district*</i>	12
<i>Contributing resources within the recommended West Downtown local historic district*</i>	239

**Note that the City of Austin does not count secondary resources as contributing/noncontributing, while the NRHP does*

ACKNOWLEDGMENTS

HHM would like to thank the following for their help in preparing this report:

- The members of the Old Austin Neighborhood Association, especially Ted Siff and Charles Peveto, for their initiative and decades of commitment to the neighborhood.
- The Texas Historical Commission, who awarded OANA and the City of Austin a Certified Local Government grant.
- Lorelei Willet, State Coordinator, Certified Local Government program, Texas Historical Commission, for flexible and supportive management of the grant.
- Leslie Wolfenden, State Survey Coordinator, Texas Historical Commission, for her thoughtful comments and attention to detail.
- City of Austin Historic Preservation Office staff, who provided thoughtful review and knowledgeable comments.

Without the vision and support of these project partners, this project would not have taken place, and HHM is grateful for their efforts.

2 | Historic Context

FOUNDING AND EARLY SETTLEMENT OF AUSTIN, 1839–1870

The present-day boundaries of the Old Austin Neighborhood Association encompass land originally developed shortly after Austin’s founding, with the oldest extant resources dating from the 1850s. At the time, Austin was transitioning from undeveloped land to a small town in the 1830s, and slowly grew into a small city because of the arrival of the government of the Republic of Texas. In 1838, the Republic of Texas decided to move the capital closer to the center of Texas and the Old San Antonio Road (El Camino Real).¹ On April 13, 1839, a commission selected a site located about 40 miles upstream from the town of Bastrop on the Colorado River, near the small settlement of Waterloo. The Republic purchased 7,735 acres of land from private landholders, excluding any improvements that had already been made to the tracts (fig. 1).² Responsibility for platting the new townsite fell upon Edwin Waller, secretary to President Mirabeau B. Lamar.³ Waller hired surveyors L. J. Pilié and Charles Schoolfield to lay out the city using a grid pattern, selecting a one-square-mile tract that included most of the survey area (figs. 2 and 3). This plan centered around the capitol, placing narrow lots for commercial development along Congress Avenue, with larger lots for residential development just to the east and west. The plan also set aside open public squares in all quadrants of the new city, as well as land for churches, a market, a county courthouse and jail, and schools. Austin’s earliest buildings clustered along Congress Avenue and Waller Creek, with a few scattered homesteads to the west (fig. 4). Most buildings were hastily constructed of “plank and logs and made of native timber, and in consequence presented no very classically artistic appearance but were serviceable and comfortable,” as described by Edwin Waller.⁴ Yet, as early as 1840, President Lamar foresaw Austin’s future growth and hired draftsman William Sandusky to plat the town’s development beyond the original square-mile grid.⁵ Sandusky’s 1840 plan created the “Austin Outlots” radiating out from downtown to the east, north, and west (fig. 5). The lots at the western edge of the survey area, adjacent to Shoal Creek, fall within this larger plan.

Figure 1. Detail of a General Land Office map. This map shows original land surveys that the Republic of Texas acquired for its new capital, totaling 7,735 acres on the east (north) bank of the Colorado River. Source: University of North Texas Libraries, *The Portal to Texas History*, <https://texashistory.unt.edu/ark:/67531/metaph89016/m1/1/>, crediting Texas General Land Office.

Figure 2. William Sandusky, *City of Austin*, 1839. Sandusky, a draftsman with the General Land Office, prepared this map in 1839 showing the original City of Austin within the Republic of Texas-owned reservation set aside for the new capital. The expansive area set aside for the capital indicates the grand vision Lamar and others planned for the seat of government for Texas's vast empire. Source: General Land Office.

Figure 3. L. J. Pilié, Plan of the City of Austin. Surveyor Pilié drew this map for the Republic of Texas in 1839. He, along with Charles Schoolfield, surveyed the area for Edwin Waller. This plan served as the blueprint for Austin’s initial development; the patterns established at the time still define the physical character of Austin’s city center. Moreover, many of the blocks identified for specific functions still contain buildings that show this town plan’s enduring quality. Source: Plan of the City of Austin [map], 1839, The Portal to Texas History, <https://texashistory.unt.edu/ark:/67531/metaph123851/>, crediting the Austin History Center, Austin Public Library.

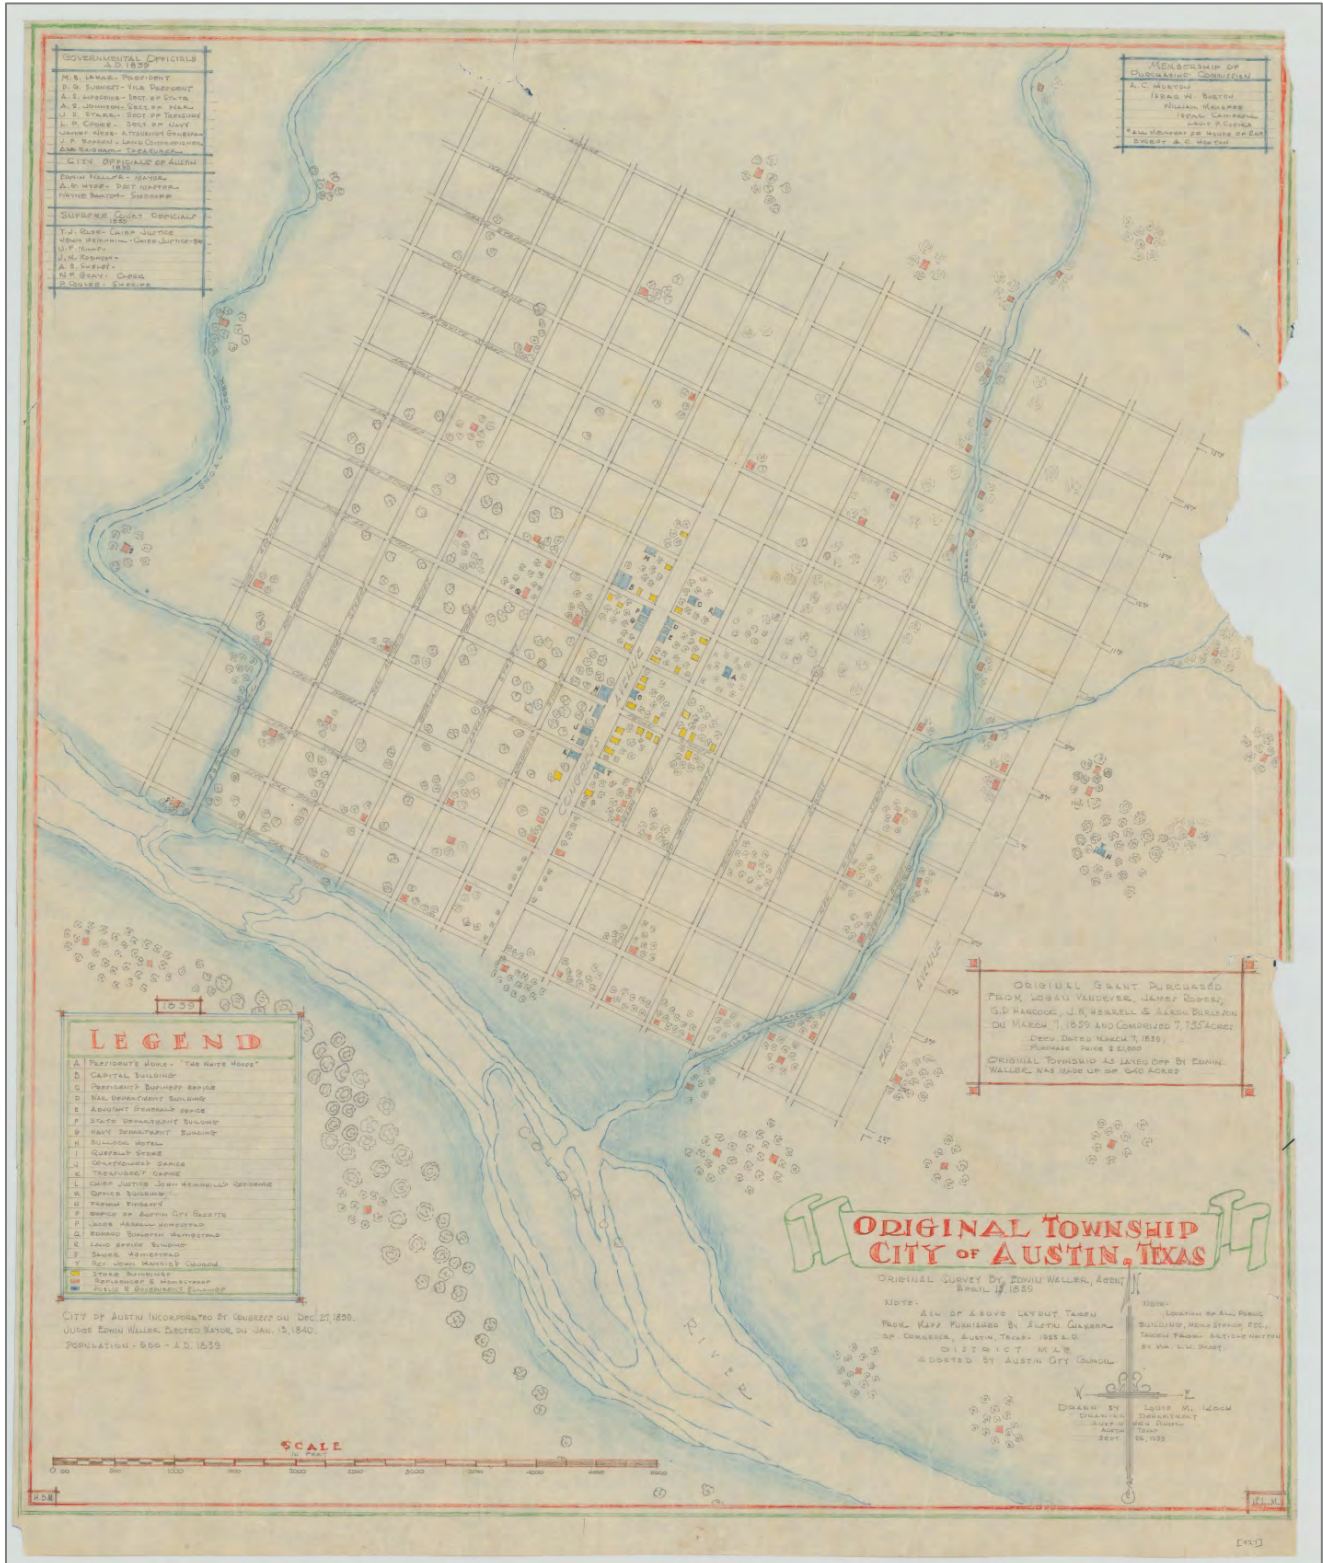

Figure 4. This map reconstructs known information about the locations of extant buildings around 1839 (based on research gathered in 1933). Note the sparse development within the downtown area. No known above-ground resources from this era remain extant within the survey area boundaries today. Source: Texas State Archives and Library Commission.

Figure 5. William H. Sandusky's 1840 Topographical Map of the Government Tract Adjoining the City of Austin (copied by Robert Reich in 1863 and again by Waller K. Boggs in 1931). The Sandusky plan of Austin Outlots established the framework for the city's growth outside the original one-square-mile plan developed by Edwin Waller. Source: General Land Office, <http://www.glo.texas.gov/history/archives/map-store/index.cfm#item/421>.

Austin's growth slowed between 1842 and 1845, when Sam Houston, who succeeded Lamar as President of the Republic, relocated the Texas capital to Houston. The United States annexed Texas in 1845, and the state capital returned to Austin. However, the city's designation as the state capital remained controversial and tenuous, hampering permanent development. In 1850, a general election determined that the capital would remain in Austin for at least 20 years.⁶ With Austin's status as the capital stabilized, development in the fledgling city boomed. Most construction activity occurred within the original one-square-mile townsite. Completion of the Greek Revival style Capitol in 1853 (no longer extant) signaled Austinites' intent to follow architectural and urban planning trends originating in Europe and evident on the East Coast.⁷ Texas Governor Elisha M. Pease selected North Carolina-born builder Abner Cook to design his mansion in the Greek Revival style (fig. 6).⁸ The mansion was completed in 1856 at present-day 1010 Colorado Street (at the eastern edge of the survey area), just southwest of the capitol (block 125 of the original 1839 Waller plan, fig. 3). Construction of the capitol and governor's mansion also required recruiting skilled craftsmen from Europe, some of whom eventually settled in the survey area. For example, mason Joseph Fischer immigrated to the United States from Germany in 1851, arriving in New Orleans, then came to Texas by 1854 and worked with Abner Cook on construction of the capitol.⁹ Raphael Mauthe came to Texas from Germany by 1852, where he worked as a master stonemason and noted mechanic, with known ties to Abner Cook.¹⁰ Both men gradually built careers and accumulated wealth over the decades to come. (Raphael Mauthe eventually built a home in 1877 at present-day 408 West 14th Street on land purchased from Abner Cook in 1852, while Joseph Fischer built a home at present-day 1008 West Avenue in 1882.)

Figure 6. Photograph of the Texas Governor's Mansion around 1860. From the Portal to Texas History, <https://texashistory.unt.edu/ark:/67531/metaph124452/m1/1/?q=governor%27s%20mansion>, crediting the Austin History Center, Austin Public Library.

However, most of the construction in the survey area in the 1850s and 1860s continued to exhibit vernacular construction methods, with little stylistic expression. A photograph taken from the governor's mansion around 1858 shows that the area still included wide swaths of open space, and that most of the surrounding construction was modest in scale, design, and ornamentation (fig. 7). One extant vernacular building from this era remains within the survey area, located at present-day 604 West 11th Street (fig. 8). The building historically functioned as an outbuilding associated with the Edward Clark homestead (no longer extant, exact location unclear). Edward Clark served as secretary to Governor Pease from 1853 to 1857, then as lieutenant governor under Sam Houston from 1859 until Houston resigned from the office in 1861 – choosing resignation rather than leading Texas into joining the Confederacy. The outbuilding at 604 West 11th Street likely housed enslaved individuals who lived and worked on the Clark homestead.¹¹

Figure 7. Photograph of the neighborhood surrounding the Governor's Mansion, looking southwest, around 1858. Note that most of the construction shown is no longer extant. From the Portal to Texas History, <https://texashistory.unt.edu/ark:/67531/metaph125156/m1/1/?q=governor%27s%20mansion>, crediting the Austin History Center, Austin Public Library.

Figure 8. Photograph of 604 West 11th Street, facing north, 2019. Note the original building's small scale and lack of architectural ornament. The building addition evident in the left portion of the photograph was added in 1930, along with plumbing and electricity. The upper story was added in 2004. Both are alterations made to the original residence. Photo by HHM.

Edward Clark also played a pivotal role in the next era of Austin's development, the Civil War years. As governor, Clark signed the Articles of Secession bringing Texas into the confederacy – an act Sam Houston refused. After losing the gubernatorial election in late 1861, Clark joined Confederate forces and fought in the war.¹² Like Clark, many Austinites joined the Confederate war effort, although Travis County had voted against secession. Austin subsequently was a source of supplies for Confederate forces. A cannon foundry operated near the mouth of Waller Creek and the General Land Office building was used as a cartridge factory.¹³ Overall, construction and development slowed during the Civil War, and no known resources from this period remain within the OANA survey area today.

In the aftermath of the Civil War, formerly enslaved individuals formed "freedmen towns," also known as "freedom communities," across Austin, including the "West Side Community" in the survey area (fig. 9). The West Side Community developed along the banks of Shoal Creek, roughly between West 2nd Street and West 10th Street. This location tended to flood often; however, it provided easy access to domestic jobs in the neighborhood's large homes. When the warehouse district developed in the late nineteenth century, the location provide proximity to jobs along the rail lines traversing the nearby warehouse district as well. Newly-freed African Americans established their communities on whatever affordable land they could find, often in areas prone to flooding and therefore less desirable for white settlement. The community started two African American churches nearby, adjacent to Wooldridge Square on a lot reserved for churches in the Waller plan. In 1869, Austin's mayor donated land at the corner of West 9th and Guadalupe Streets to construct the "First (Colored) Baptist Church" (fig. 10; no longer extant, congregation relocated in 1970).¹⁴ Soon thereafter, around

1873, the Metropolitan AME Church opened at the southeast corner of West 9th and San Antonio Streets (no longer extant; congregation relocated to 1101 East 10th Street by 1923). A school for African American children—reportedly one of the first in Austin—opened in the Metropolitan AME Church around 1873.¹⁵ A public segregated school, “West Austin School (Colored)” (also called the “West Avenue School”), located at the corner of West Avenue and West 5th Street (no longer extant), was established by 1897.¹⁶ In the ensuing decades, the African American community was displaced to Austin’s East Side. No extant resources associated with the West Side Community remain in the survey area today.¹⁷ A similar forced migration occurred within the Mexican American community settled around Republic Square, as discussed below on page 31.

Figure 9. Freedmen towns in Austin. This map is based on the research of Michelle M. Mears’ master’s thesis, “African American Settlement Patterns in Austin, Texas, 1865-1928” (Baylor University, 2001), 73. The areas depicted include 1) Robertson Hill [1869]; 2) Pleasant Hill [1865]; 3) Masontown [1867]; 4) Gregorytown [1890s]; 5) Horst’s Pasture [no date]; 6) Wheatville [1869]; 7) Clarksville [1871]; 8) South Side Community [1870s-1890s]; 9) West Side Community [1876]; 10) Red River Street Community [1876]; and 11) Barton Springs Community [1865]. Source: General Land Office (base map), overlay by Michelle M. Mears.

Figure 10. Photograph of the “First (Colored) Baptist Church” around 1869, looking northeast. Note the original 1853 Texas State Capitol in the background. Note also that this building was replaced around 1916, and the building was demolished when the congregation relocated around 1970. Source: The Portal to Texas History, <https://texashistory.unt.edu/ark:/67531/metapth124803/m1/1/?q=first%20baptist%20austin>, crediting the Austin History Center, Austin Public Libraries.

THE GILDED AGE IN AUSTIN, 1871–1892

Austin's economy grew during the 1870s as the nation entered a new period of prosperity. An expanded rail network brought more commerce to Austin, and an increased statewide economy led to growth of the state government and Austin's universities – including the establishment of present-day Huston-Tillotson University on Austin's East Side in 1875, as well as the founding of the University of Texas at Austin just north of downtown in 1883. The location of rail lines also shaped surrounding land use. By the 1880s, railroads cut through East Austin along 6th Street and through downtown along 3rd Street (fig. 11). Warehouses and related industries rapidly sprung up along the rail lines. The prospering businessmen who owned rail-related enterprises sought to construct new homes close enough to the rail lines to provide an easy commute, but far enough away to provide separation from their noise and bustle. The area within the present historic resources survey effort proved ideal. It was located just blocks away from the rail lines and the Congress Avenue commercial district, but the higher elevation allowed for more light and fresh air. Beginning in 1875, the presence of Austin's first horse-drawn streetcar system nearby made the area desirable as well.¹⁸ The larger lots also allowed for construction of grand new homes to showcase new affluence. The railroad not only imported building materials, it also provided exposure to new architectural styles.

Figure 11. Detail of Ruben W. Ford, *Revised Map of Austin, Texas*, 1885. This map captures the railroad network by the mid-1880s. It also notes the several “county roads” that linked Austin with other communities and granted area farmers and ranchers access to outside markets. These roads likewise gained significance over time and include major arterials in our current street network in Central Austin including Lamar Boulevard, Duval Street, Manor Road, Webberville Road, West 6th Street, and South Congress Avenue. Source: Texas Library and Archives Commission.

Figure 12. Photograph of 1003 Rio Grande Street, facing north by northeast, 2019. Source: HHM.

The railroad brought an influx of diverse new residents, as Austin's population tripled from 1870 to 1880. Between 1870 and 1880, census counts of Austin's population experienced an almost three-fold increase from a decade earlier.¹⁹ The 1880 census identified almost one-third of Austin's population as "colored."²⁰ Foreign-born immigrants constituted another 10 percent of Austin's population in 1880, originating from Germany, Mexico, Ireland, Sweden, England, Poland, France, Italy, and China.²¹

Henry Hirshfeld, a German Jewish merchant, immigrated in 1860 and arrived in Austin by 1868, when he established a mercantile business at the corner of Congress Avenue and 6th Street. In 1876, he and his wife Jenny Melasky Hirshfeld built a modified-L plan cottage with Italianate stylistic influences at present-day 303 West 9th Street (fig. 13).²² In the coming years, Hirshfeld's mercantile business grew and prospered. An advertisement from 1882 touted that "Mr. Henry Hirshfeld has purchased an unusually large stock of dry goods and clothing, etc. and is determined not to be outdone by anyone in quality or cheapness of his goods."²³ By 1885 Hirshfeld's success allowed him to begin construction of a larger home adjacent to his 1876 cottage, designed with Italianate and Eastlake stylistic influences and completed around 1886 (fig. 14). Hirshfeld became a founding partner of the Austin National Bank in 1890.²⁴ At the time of his death in 1911, *The Austin Daily Statesman* praised Hirshfeld as "one of the pioneer citizens of Austin," noting his influence on the Austin National Bank, the Hill City Lodge of Masons, the Jewish Independent Order of B'Nai B'rith, and the Austin Saengerrunde organization for German immigrants.²⁵

Figure 13. Photograph of the Hirshfeld Cottage (1876) at 303 W. 9th Street, facing south, 2019. Photo by HHM.

Figure 14. Photograph of the Hirshfeld House (1886) at 303 West 9th Street, facing south, 2019. Photo by HHM.

The Mexican American community that settled around Republic Square further exemplified this trend. Beginning around the 1870s, Mexican American families lived south of West 5th Street, between Colorado Street and Shoal Creek (partially outside the survey area).²⁶ By the 1880s, the Mexican American community held cultural gatherings in nearby Republic Square.²⁷

The growth and diversification of Austin's population and economy, in turn, facilitated development of new public buildings and institutions. One of the state's first public schools was constructed in 1876 on the site of

present-day Pease Elementary at 1106 Rio Grande Street (fig. 15).²⁸ The original Austin High School also opened in the early 1880s, located on Rio Grande Street north of West 12th Street (the block set aside and marked “University” in the Sandusky plan).²⁹ Adjacent to the survey area, the government of Travis County constructed a new courthouse just south of the capitol in 1876 (no longer extant).³⁰ In 1881, the state capitol building burned, and its Renaissance Revival replacement was constructed between 1885 and 1888.³¹ To the north of the capitol, construction of the University of Texas began in 1882, with classes beginning in 1883.³² The proximity of these institutions made the area attractive for government officials, lawyers, and educators as well.

Figure 15. Early photograph of the school building at 1106 Rio Grande Street, date unknown (likely prior to the 1896 fire). Source: The Portal to Texas History, <https://texashistory.unt.edu/ark:/67531/metaph124170/m1/1/>; crediting Austin History Center, Austin Public Library.

TURN OF THE TWENTIETH CENTURY, 1893–1932

Across the city and across the nation, single-family residential development shifted to the suburbs in this era, encouraged by streetcars and automobiles. In Austin, the horse-drawn streetcar line expanded in the 1880s, traversing the downtown area. A map of Austin from 1900 shows that the streetcar line stretched along West 6th Street, Lamar Boulevard, Congress Avenue, and part of Colorado Street (from Martin Luther King Jr. Boulevard to Congress Avenue). Construction of the bridge along West 6th Street over Shoal Creek in 1887 facilitated development to move westward.³³ By 1891, electric streetcars ran throughout Austin, roughly following the old horse-drawn streetcar lines (fig. 16).³⁴ Automobiles arrived in Texas as early as October 1899.³⁵ Quickly, the automobile replaced the streetcar as Austinites' preferred means of transportation. At first, though, the lack of paved roads made auto transportation slow. Statewide, city and county governments issued bonds to fund road paving. Congress Avenue was paved with brick in 1905.³⁶ Beginning in 1913, Travis County funded asphalt paving along some major streets in downtown Austin. Some of the earliest paved streets, like Guadalupe and Lavaca Streets, were part of the "Meridian Highway" system that predated present-day Interstate Highway 35.³⁷ The 1928 Koch & Fowler *City Plan for Austin, Texas* recommended further paving (fig. 17).³⁸ With the increase in road paving, auto ownership significantly increased. Motor vehicle registration records in 1916 documented about one vehicle per 25 persons in the State of Texas.³⁹ By 1920, motor vehicle registrations in the state rose to one vehicle per 10 persons.⁴⁰ These changes radically impacted development on Austin's suburban fringes, especially after the adoption of Koch & Fowler's 1928 plan, which promoted suburban growth and segregation. In downtown Austin, these historical forces led to more subtle changes in land use and demographics.

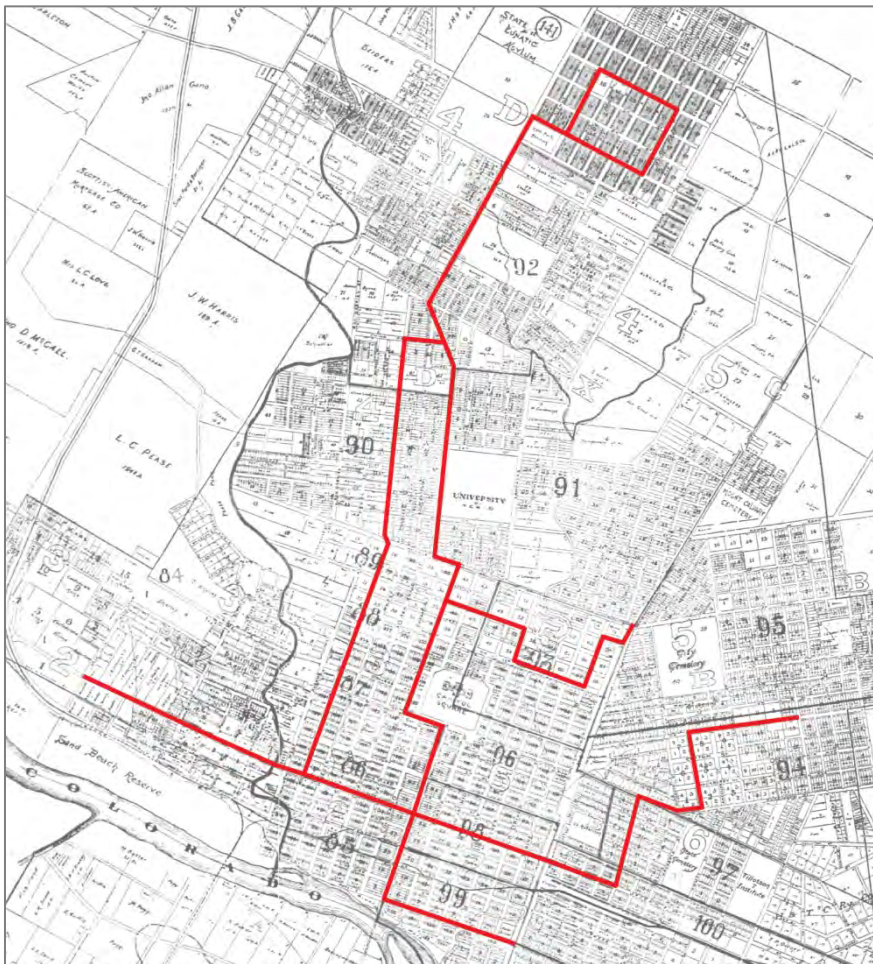

Figure 16. Detail of Morrison & Fourmy Directory Co., *Map of the City of Austin, Texas*, 1900. This map was created by the publisher of the Austin city directory and was also used by the US Census Bureau for the decennial census. The map notes in red the streetcar line that provided service to densely populated areas in the city center as well as to new suburban developments on the outskirts of town, most notably Monroe Shipe's Hyde Park subdivision. Source: Perry Castañeda Map Collection at the University of Texas at Austin, overlay by HHM.

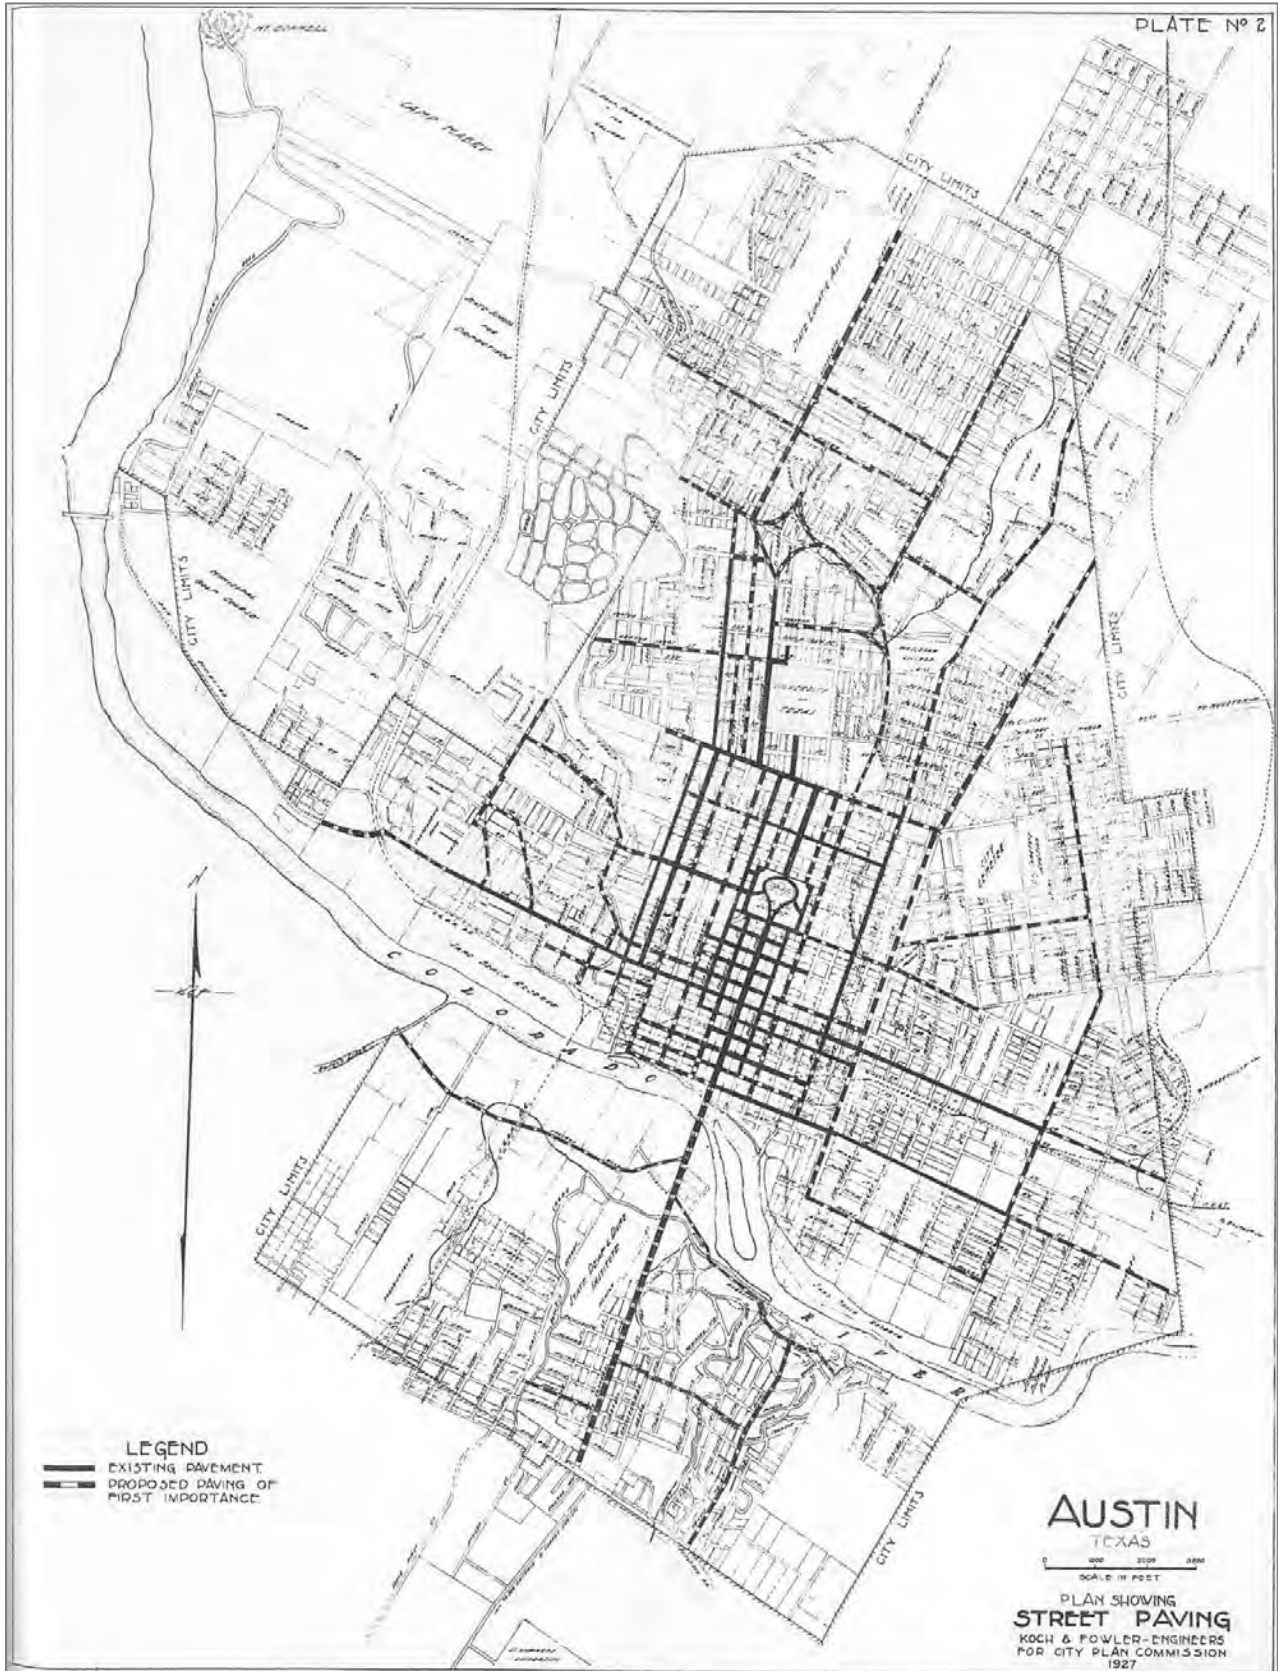

Figure 17. Map showing existing versus proposed road paving, 1928. Source: Koch & Fowler, *A City Plan for Austin, Texas*, prepared for the City of Austin, 1928.

Auto-related commerce also popped up along paved roads at the edges of the survey area. Sanborn Fire Insurance Maps from 1935 show numerous gas stations, car dealerships, garages, and hotels along West 6th Street, with additional examples on Guadalupe, Lavaca, and Colorado Streets. However, few examples from this era remain today. One representative example is 213 West 5th Street (fig. 18). After 1928, the Koch & Fowler plan also encouraged general commercial development along West 6th, West 7th, Lavaca, and Colorado Streets (fig. 19). These recommendations took time to implement, though, and Sanborn maps from 1935 continue to show numerous residential properties along these commercially zoned corridors. Newer houses were especially likely to remain in residential use for decades to come, such as the circa 1933 house at 700 Rio Grande Street. (fig. 20). (Today, however, very few single-family residential resources remain in the areas zoned commercial in the 1928 plan.)

Figure 18. Historic photo of 213 West 5th Street—the Austin Exide Battery Company—facing southeast. This building is shown as a gas station on Sanborn Fire Insurance Maps from 1935, reflecting the role of West 5th Street as a prominent arterial in the auto era. Figure 20. Photo of house converted to commercial use at 700 Rio Grande, looking northwest, 2019. Photo by HHM.

Amid this context, residential land use at the core of the survey area remained relatively stable between 1893 and 1932. By the 1890s, development already occupied most blocks throughout the survey area (fig. 21). The boundaries of Austin’s Sanborn maps expanded to include the area in 1894, and the maps show widespread development but varying densities, with some blocks including one or two large homesteads and others densely developed with many small dwellings. Development followed similar patterns until about 1915, with sizeable new single-family houses constructed on the limited remaining empty land. For example, the Classical Revival house still standing at 703 West 10th Street was constructed around 1905 on a lot shown as empty on the 1900 Sanborn maps (fig. 22). Over the next few decades, the neighborhood grew denser, as some owners of large plots built smaller homes on the same blocks as new estates and others demolished older homes to construct denser new housing, including multifamily housing such as the apartment building at 605 West 10th Street (fig. 23). By 1928, the survey area was one of Austin’s densest neighborhoods, as indicated on a map showing existing housing density at the time from Koch & Fowler’s *A City Plan for Austin, Texas* (fig. 24). The few large single-family houses constructed in the area in the 1920s and early 1930s either replaced earlier large houses—as did the house at 602 West 11th Street built about 1930 (fig. 25)—or were constructed on the steep bluffs along West Avenue (figs. 26 and 27).

Figure 21. Augustus Koch, *Austin, State Capital of Texas*, 1887, cropped to show the 2019-2020 survey area. Source: Koch & Fowler, *A City Plan for Austin, Texas*, prepared for the City of Austin, 1928

Figure 28. Map showing racial distribution of population, 1928. Source: Koch & Fowler, *A City Plan for Austin, Texas*, prepared for the City of Austin, 1928.

Demographically, the area transitioned to predominantly white residents even before the 1928 Koch & Fowler plan recommended pushing non-white public schools and cultural institutions to Austin’s East Side (fig. 28) – likely because commercial development surrounding West 6th Street increased property values. Maps in the 1928 Koch & Fowler plan show that the only remaining pocket of “miscellaneous” non-white residents in the survey area was the 600 block of West 11th Street (the location of the former Edward Clark slave cottage, fig. 8 above). The decline in the area’s African American population led to the reuse of the school at West 5th Street and West Avenue for the Latino population.⁴¹ Figure 28 also shows “miscellaneous” occupants on the 300 block of West 5th Street, adjacent to Republic Square, but Sanborn maps and city directories both show that block fully commercial by the 1920s. Nearby, the Catholic Church of Our Lady of Guadalupe at 504 Guadalupe Street functioned as a landmark for the Mexican American community around Republic Square beginning in 1907 (fig. 29). After 1910, political instability in Mexico brought new immigrants to Austin, straining the church’s capacity. As a result, the church moved to Austin’s East Side by 1926.⁴² By 1935, Sanborn maps show the church’s former site vacant, with the surrounding lots devoted to auto-related commerce and apartment buildings.

Figure 29. The original Our Lady of Guadalupe Parish, date unknown. This sanctuary stood at 504 Guadalupe and served as the principal place of worship for the local Mexican American community. The Holy Cross Fathers led the congregation until the Missionary Oblates of Mary Immaculate assumed control in 1925. When the parish moved to East Austin in 1926, this building was dismantled and materials were salvaged to construct the new sanctuary at 905 Lydia Street. That building was replaced with the current edifice at 1206 East 9th Street in 1953. Source: Our Lady of Guadalupe Catholic Church.

To maintain livability amid growing density, progressive Austinites organized to fund more public recreational spaces. Open space existed in Austin previously, but it was unmaintained. In 1909, Austin Mayor Alexander Penn (“A.P.”) Wooldridge championed establishment of the city’s first landscaped municipal public park on one of the four public squares set aside in the 1839 Waller plan, bound by West 9th, West 10th, Guadalupe, and San Antonio Streets. During the nineteenth century, the public seldom used the square because its topography included a natural basin with a spring-fed creek, which became a swamp-like from rising waters each time it rained.⁴³ The Wooldridge family lived nearby at West Avenue and West 10th Street by 1900, and witnessed the flooding first hand.⁴⁴ Around 1900, the City of Austin installed a culvert to improve drainage, but further improvements stalled until Wooldridge’s election as mayor in 1909. Wooldridge saw that the basin’s topography created a natural amphitheater. Under his guidance as mayor, the City moved forward with “preserving trees, hauling in landfill and sod, landscaping, and building a bandstand, spanning the shallow gully formed by the springfed brook.”⁴⁵ Wooldridge commissioned prominent architect Charles H. Page to design the Classical Revival style bandstand that remains today (fig. 30). With these improvements in place,

Wooldridge Square became a gathering place for musical performances and picnics (fig. 31). The site held numerous political gatherings as well, including Booker T. Washington’s 1911 speech in which he argued against the Great Migration of rural African Americans to northern cities, thereby shaping the ideas of Mayor Wooldridge and local black leaders, eventually leading to the 1928 plan for a separate district for African Americans in East Austin.⁴⁶ Minnie Fisher Cunningham also made her announcement to run in the 1928 US Senate campaign at Wooldridge Square.⁴⁷

Figure 30. Wooldridge Square. Named for Mayor A. P. Wooldridge, this park has been an important gathering place in downtown Austin since its dedication in 1909. Numerous civic functions, celebrations, and concerts have been held on the grounds. It also was used by many politicians who launched their campaigns at the park, including Governors O. B. Colquitt, James E. “Pa” Ferguson, Pat Neff, Dan Moody, James Allred, W. Lee “Pappy” O’Daniel, and Allan Shivers. Source: *Souvenir of Austin, Texas: Capital of the Great Lone Star State*, 1911, *The Portal to Texas History*, <https://texashistory.unt.edu/ark:/67531/metaph39135/m1/4/>; crediting Austin History Center, Austin Public Libraries.

Other municipal and public works projects included improvement of schools and the construction of the new Travis County Courthouse. The new Allan Junior High School building was constructed in 1915 on the former site of Austin High School at West 12th Street and Rio Grande (fig. 32). Austin High temporarily moved to a site at East 9th and Trinity Streets from 1915 and 1925, but the school moved back to the Rio Grande Campus in 1925. Allan Junior High swapped sites with the high school, moving into the campus at East 9th and Trinity Streets. Over the coming years, Austin High expanded on the Rio Grande site, including a gymnasium behind the school at 1218 West Avenue in 1929.⁴⁸ The County acquired land north of Wooldridge Square in the late 1920s and commissioned an Art Deco courthouse by local architects Page Brothers which was completed in 1931 (fig. 33).⁴⁹ Placing this important public facility adjacent to one of the City's original squares followed layout principles of the original Waller plan, thereby reflecting the endurance of the city designer's vision.

Figure 32. Photograph of the Austin High School campus at West 12th Street and Rio Grande Street, 1934. An earlier high school building was located on the site from about 1885 until 1900. The building shown in this photo was constructed in 1915 and served as Allan Junior High School from 1915 to 1925. Austin High School moved into the building in 1925. Source: The Portal to Texas History, <https://texashistory.unt.edu/ark:/67531/metaph124201/m1/1/>, crediting the Austin History Center, Austin Public Libraries.

Figure 33. Jordan-Ellison, Travis County Courthouse, 1931. The image was taken as the building was being completed. The courthouse is one of Austin's most notable examples of Art Deco style architecture. Designed by Page Brothers, it epitomizes the kind of monumental public architecture that enjoyed considerable popularity during the 1930s. The building has been in use for over 80 years, but county commissioners are contemplating its replacement. Now known as the Heman Marion Sweatt Travis County Courthouse to honor the civil rights activist who helped desegregate the University of Texas Law School, the building retains its salient and character-defining features to an exceptional degree and is listed in the National Register. Source: University of North Texas Libraries, *The Portal to Texas History*, <https://texashistory.unt.edu/ark:/67531/metaph125310/m1/1/>, crediting the Austin History Center, Austin Public Libraries.

GREAT DEPRESSION AND WORLD WAR II, 1933–1945

During the Great Depression and the years that followed, very little economic expansion and land development occurred in the survey area. Although Austin’s population continued to rise, suburban areas absorbed most of the new housing growth, consistent with the recommendations of the 1928 Koch & Fowler plan and lending practices of the day. During the Depression, the Home Owners’ Loan Corporation (HOLC) created maps that evaluated mortgage loan risk, and considered the aging housing stock in the survey area “definitely declining” (fig. 34).⁵⁰ Residential construction within the survey area was limited to a few modest houses and outbuildings, plus a few multi-family buildings like the Tucker Apartment House at 1105 Nueces Street (fig. 35). Civilian public works projects comprised most new construction in the 1930s. These projects were designed to provide jobs and stimulate the local economy. One significant public project was the construction of a new public library at 810 Guadalupe Street, facing the south side of Wooldridge Square (fig. 36, now the Austin History Center). The new library was designed by prominent Austin architect Hugo Kuehne in a formal Italian Renaissance Revival style, compatible with the prominence of its high-profile site adjoining the newly redesigned Wooldridge Square.⁵¹ Another monumental project was the 1936 US Federal Courthouse at 200 West 8th Street (fig. 37). The Art Moderne-style building was designed by the Office of the Supervising Architect for the US Treasury Department and constructed using federal funding from the Public Works Administration at a time when the US economy relied heavily upon New Deal-era federal projects.⁵² Other notable New Deal-funded projects enhanced the Austin High School campus on Rio Grande Street, including the 1939 annex north of the school and the 1942 House Park stadium west of the campus (fig. 38).⁵³

Figure 34. HOLC Map of Austin, 1934, noting tiers of perceived mortgage lending risk. Note that areas with mixed racial demographics and aging housing stock were perceived as “hazardous” (red), while areas with predominantly white residents and aging housing stock were considered “definitely declining” (yellow). Source: *Urban Oasis: Research Projects: Digital HOLC Maps*, “Austin, Texas,” accessed July 28, 2016, <http://www.urbanoasis.org/projects/holc-fha/digital-holc-maps/>.

The US entrance into World War II in December 1941 led to a rapid decline in civilian public works projects. Instead, federal spending turned to the war effort and included the buildup of military bases and industrial facilities to provide the goods and materials to support the war. In the Austin area, new military facilities included the Del Valle Army Airfield and a \$1.6 million magnesium plant operated by Union Potash Company.⁵⁴ These military-related developments brought more people to Austin, creating a housing shortage. The limited construction in the area throughout the 1940s reflects the need for modest, affordable apartment housing during that time. An example of these affordable apartments remains at 1306 Rio Grande Street (fig. 39).

POSTWAR DEVELOPMENT, 1946–1974

In the postwar era, the US economy boomed, and urban centers grew as returning veterans found new jobs. Austin’s governmental and higher education sectors grew alongside the overall state economy. The majority of residential growth in Austin continued to follow suburban patterns advocated by the 1928 Koch & Fowler plan and mortgage lenders (fig. 34 above). Families moved out of single-family homes downtown and relocated to new subdivisions in the rapidly expanding suburbs. In the late 1940s and 1950s, commercial development ensued, especially along West 12th Street. Shopping centers began to emerge on expansive lots along major roadways in suburban Austin, offering a convenient place for residents of nearby neighborhoods to obtain everyday goods. The shopping center at Lamar Boulevard and West 12th Street (figs. 40 and 41), built between 1947 and 1949, exemplifies postwar commercial developments in Austin. Businesses gradually moved eastward along West 12th Street into the residential core of the neighborhood in the 1950s, generally respecting the residential scale and height of the neighborhood but using new modern architectural idioms to differentiate themselves from the surrounding houses (fig. 42).

Hospitals Show Progress Ahead Is Still Long

The statistics of a long range plan have pushed the state's progress ahead of what it has been in years past.

Support Needed
With every citizen's interest and support the system can surge forward—more people can be diagnosed and treated during the early days of their admission—and can return to a normal life with adequate rehabilitative help and understanding in their local community.

What should be known about Texas' state mental hospitals?

There are six state mental hospitals—in Austin, Big Spring, Brownsville, Terrell, and Wichita Falls—making 12,512 patients and a space designed for 8,864.

Three geriatric centers, which should be coming on line for selected mentally ill patients have 82 average of 2,000 patients daily, compared to a space for 3,022.

The state has made its first step toward alleviating the situation. Early last the Legislature provided a building fund of \$40,000,000 for a seven year program of expansion and improvement of the physical plants of the institutions. It was become evident that new buildings alone wouldn't answer the problem.

So repairs and replacements were given part of the funds. New fresh paint has replaced peeling walls, new roofs have done away with leak-topped ceilings, and drinking fountains take the place of water jugs and hotwater taps.

During the past five years new buildings have come up providing modern X-rayed diagnostic clinics, and treatment facilities for 7,500 patients.

Yet even this is not enough. For every new bed in the state mental hospitals there are twelve old buildings that need to be replaced.

And state statisticians predict that our state mental hospitals will be faced with the problem of caring for and treating three times as many patients in 1972 as there are today if present trends in both the growth and changing characteristics of the Texas population continue.

Progress Made
The state hospital system has had some results. . . .
Favorable of the patients who . . .

New residential development in the survey area continued to shift toward apartments. Low-rise apartment buildings began to appear, catering to the growing number of white-collar office workers employed at the University of Texas and State and municipal governments who sought housing downtown. As families moved to the suburbs, the downtown area's demographic shifted younger. The Regency Apartment Building constructed at 601 West 11th Street in 1960 illustrated this trend, replacing older single-family homes with modern apartment buildings (fig. 43). Longtime residents at the apartment complex, many of whom were women, recollected moving to postwar Austin to work at the nearby capitol, recalling the excitement of being a single working woman in the city.⁵⁵ The high-rise Westgate Towers at 1122 Colorado Street followed in 1965 (fig. 44). The architectural commission for the Westgate Tower went to New York City-based architect Edward Durrell Stone, known internationally for designs like 2 Columbus Circle in New York and the Kennedy Center for the Performing Arts in Washington, D.C. After accepting the commission, Stone worked with local Austin architecture firm Fehr & Granger. The building housed the political Headliner's Club quarters and the residences of influential Austinites, including:

A.R. "Babe" Schwartz, State Representative from 1955-1959 and State Senator from 1960-1981; Billy Clayton, Speaker of the Texas House of Representatives from 1975-1983; Robert Rowland, Assistant Attorney General of Texas from 1958-1962; political activist and lobbyist Bettie Naylor; lobbyist Jack Wheeler; Camille and John Butler of the Elgin Butler Brick Company, whose brown brick covers the building; Ethel "Sunny" Clift, mother of actor Montgomery Clift; and actress Amanda Blake, who played the character of "Miss Kitty" on the television series *Gunsmoke*.⁵⁶

At the same time, downtown remained the cultural hub of Austin. Rising vacancies in the neighborhood allowed some institutions to expand. The First Church of Christ, Scientist constructed a new campus at 1309 Guadalupe Street around 1950, and the First Methodist Church enlarged its campus at 1201 Lavaca Street around 1965. Travis County gradually constructed new facilities near the county courthouse, beginning with the annex at 314 West 11th Street (fig. 45) around 1953 and continuing with new buildings at 1010 Lavaca Street around 1959 and 411 West 13th Street around 1973. Throughout this period, the neighborhood to the west of downtown Austin retained the key anchors that defined it beginning with Austin's founding in 1839: a governmental node adjoining the capitol and Wooldridge Square, an array of historic residential properties at the core, and a mix of small-scale local commerce at the fringes. This organic mixed-use blend and the inherent walkability of the original 1839 grid plan has allowed the neighborhood to remain one of Austin's most vibrant areas for 180 years.

Figure 45. Photograph of the Travis County Courthouse annex at 314 West 11th Street, facing northwest, 2019. Photo by HHM.

3 | Survey Results and Recommendations

This section consists of a summary of the findings for the Historic Resources Survey for Old Austin Neighborhood Association. During November of 2019, HHM architectural historians conducted a survey effort that documented all resources on parcels visible from the public right-of-way within the determined survey area, regardless of construction date. The HHM survey team documented 448 resources within the survey boundaries and evaluated the integrity of all resources built in or before 1974, for both City of Austin local resource eligibility and listing in the NRHP.¹ Field evaluations were completed by professionals meeting or exceeding the *Secretary of the Interior’s Professional Qualification Standards* (36 CFR 61), and project historians carefully followed the standards of the National Register Criteria for Evaluation.

Table 3-1 below reveals the breakdown of overall eligibility recommendations and preservation priority rankings. Summary tables for each eligibility category follow. Refer to *Appendix A* for maps depicting the locations of surveyed resources. Refer to *Appendix B* for a more detailed inventory with thumbnail photographs, as well as *Appendix C* for survey forms with larger photographs and additional details regarding physical features, integrity, historical research, criteria for eligibility, areas of significance, and periods of significance.

Table 3-1. Number of resources per each eligibility recommendation category.

Eligibility Recommendations	No. of Resources
Individual resources previously listed in the NRHP	25
Individual resources recommended for NRHP listing	132
Individual resources with prior State RTHL, OTHM, or SAL designations	36
Individual resources previously designated as local historic landmarks	60
Individual resources recommended for local historic landmark designation	64
Historic district(s) listed/recommended for NRHP listing	2
<i>Contributing resources within the listed Bremond Block NRHP historic district</i>	13
<i>Contributing resources within the recommended West Downtown NRHP historic district</i>	266
Historic district(s) recommended for local historic district designation	2
<i>Contributing resources within the recommended Bremond Block local historic district*</i>	12
<i>Contributing resources within the recommended West Downtown local historic district*</i>	239

*Note that the City of Austin does not count secondary resources as contributing/noncontributing, while the NRHP does

LOCAL HISTORIC LANDMARKS

During the field survey, HHM made preliminary eligibility recommendations based primarily on a resource’s architecture and integrity in its present state. The City of Austin Historic Preservation Ordinance states that a resource must meet a 50-year age threshold and must derive significance from **at least two** criteria to be eligible for historic zoning. The resource also must retain sufficient integrity to convey that significance.²

The survey area included 60 previously designated local historic landmarks, listed in table 3-2. This survey report recommends maintaining the current local historic landmark designation for all of these resources.

HHM identified an additional 64 resources recommended eligible for designation as local historic landmarks, listed in table 3-3. All maintain physical integrity meeting the threshold for local landmarks specified by the City. In addition, all have significant historical associations or community value established by property-specific investigations—including city directory or historic newspaper research—and/or associations with themes within the *Historic Context* earlier in this report. Note that further research, including research regarding

ownership history and deed records, may need to be conducted in order to meet the standards of the City of Austin’s Landmark application. In addition, future in-depth research may reveal areas of significance for other resources that make them eligible for local historic landmark designation. Note that many of these resources also are located within an eligible local historic district. If the eligible local district is officially zoned historic, the City of Austin will hold individual landmark applications within the district to a higher standard. However, property owners may opt to designate eligible individual landmarks unless/until the historic district is officially designated.

For maps of designated and recommended local historic landmarks, see *Appendix A*. For an inventory, see *Appendix B*. For detailed information, including criteria and areas of significance, see *Appendix C*.

Table 3-2. Previously designated individual local historic landmarks by address. Resources with an asterisk () are also located within a recommended local historic district.*

LOCAL HISTORIC DISTRICT RECOMMENDATIONS

HMM historians observed two potential local historic overlay districts in the course of field investigations. Both the City of Austin and the NRHP define a local historic district as a “geographically-defined area possessing a significant concentration of buildings united by their history and/or architecture.”⁴ For this survey’s purposes, the City considers eligibility for listing as a National Register historic district and as a City of Austin historic district to be equivalent. Both potential overlay districts consist of an area with a high density of resources with similar property types, architectural styles, construction years, development patterns, and with sufficient integrity to convey historic character. The boundaries of a local historic overlay district are to be based on this density of like resources and drawn to include contributing resources. The City of Austin defines contributing as “any resource which adds to the historical integrity or architectural qualities that make a historic district significant.”⁵ Contributing resources must also be at least 50 years old, built during the period of significance, and retain sufficient integrity to convey its historic character.

For maps of resources within recommended local historic districts, see *Appendix A*. For detailed information, see *Appendix B* and *Appendix C*.

BREMOND BLOCK HISTORIC DISTRICT

The first identified eligible local historic district is the Bremond Block NRHP historic district, listed on the National Register in 1970. It consists of 12 primary resources, all (100%) of which are considered contributing to the local historic district. See table 3-4 below. Also see figures ii, iii and iv in the *Executive Summary* for maps depicting the existing NRHP district boundaries and the recommended boundaries for the local historic district. Note that all resources within this eligible district currently are designated local historic landmarks, so designating a historic district would have little impact on future City historic preservation planning and management efforts.

Table 3-4. Primary resources by address within the proposed Bremond Block Local Historic District, including their historic names, year built, and contributing status. Resources with an asterisk () are also designated individual local historic landmarks. (Note that secondary buildings are not included in local districts in the City of Austin.)*

WEST DOWNTOWN HISTORIC DISTRICT

The second recommended local historic district is the West Downtown Historic District, consisting of the majority of the historic-age resources in the survey area. An in-depth analysis of the recommended West Downtown local historic district can be found in the *NRHP Historic District Recommendations* subsection below, as the boundaries for the NRHP district and local district are consistent. The districts proposed

boundaries encompass 299 primary resources, 239 of which contribute to the district’s historic character (80%). See table 3-5 below. Also see figures ii, iii and iv in the *Executive Summary* for maps depicting the recommended boundaries for the local historic district. Given the City’s requirement for property-owner support, boundaries of the district may be refined to correspond to property-owner preferences in addition to historical trends.

Table 3-5. Primary resources by address within the proposed West Downtown Local Historic District, including contributing/noncontributing status. Resources with an asterisk () are also designated or eligible individual local historic landmarks. (Note that secondary buildings are not included in local districts in the City of Austin.)*

INDIVIDUAL NRHP RESOURCES

For all properties recommended for listing to the NRHP, HHM’s recommendations are based upon the NRHP criteria set forth in *National Register Bulletin 15: How to Apply the National Register Criteria for Evaluation*. Resources only need to meet **one** NRHP criterion to be individually eligible. Resources recommended eligible may be noteworthy local examples of architectural styles or exceptional design, or they may possess significance for their historical associations. They also must retain sufficient integrity to convey their significance. Note that NRHP eligibility or listing does not impose land-use regulations on private property owners. While eligibility for listing in the NRHP provides a degree of protection from federally funded or permitted projects, only state or local designation can protect a significant historic property from inappropriate changes or demolition initiated by a private owner or developer.

The survey area included 25 individual resources previously listed on the NRHP, documented in table 3-6. This survey report recommends maintaining the current individual NRHP listings for all of these resources.

In addition, HHM architectural historians identified 132 historic resources recommended eligible for individual listing in the NRHP, listed below in table 3-7. Many of these resources also are located within an eligible NRHP historic district. If the eligible NRHP district is officially listed, the National Park Service may not agree to process individual nominations within the listed district. However, property owners may opt to nominate eligible individual resources unless/until the historic district is officially listed.

For maps of individual resources listed or recommended for the NRHP, see *Appendix A*. For detailed information, see *Appendix B* and *Appendix C*.

Table 3-6. Previous individual listings in the NRHP by address. Resources with an asterisk (*) are also located within a listed or recommended NRHP historic district.

NRHP HISTORIC DISTRICT RECOMMENDATIONS

All NRHP recommendations for this survey are subject to a more thorough review and approval by the THC and will require preliminary determinations of eligibility. The following section describes and analyzes the potential district within the project survey area that HHM has identified as eligible for listing in the NRHP. Refer to figures ii and iii in the *Executive Summary* for historic district recommendation data.

WEST 6TH STREET HISTORIC DISTRICT

The survey area included one resources within the NRHP-listed West 6th Street historic district, located at 210 West 6th Street. The building retains sufficient integrity and significance to contribute to the character of the historic district. However, the majority of the West 6th Street NRHP historic district lies outside the scope of this survey project. HHM recommends reevaluation of the overall eligibility of the district in a future survey.

BREMOND BLOCK LISTED HISTORIC DISTRICT

The Bremond Block NRHP historic district was listed on the National Register in 1970. It consists of 13 resources, all (100%) of which are considered contributing to the local historic district. See table 3-8 below. Also see figures ii, iii and iv in the *Executive Summary* for maps depicting the existing NRHP district boundaries and the recommended boundaries for the local historic district.

Table 3-8. Resources by address within the listed Bremond Block NRHP District, including their historic names and contributing status. (Note that secondary resources are included per NRHP guidelines.) Resources with an asterisk (*) are also individually NRHP-listed or eligible for individual NRHP listing.

WEST DOWNTOWN HISTORIC DISTRICT

The West Downtown Historic District consists of a cohesive grouping of historic resources that is recommended eligible for listing in the NRHP as a historic district. This collection of properties includes residential properties like single-family homes, duplex houses, and apartment buildings, commercial buildings including stores and office buildings, and institutional resources like schools and churches. Residential properties within the proposed district feature popular stylistic influences from the period, including Craftsman, Classical Revival, Folk Victorian and Queen Anne. The district also includes noteworthy structures, such as two Moonlight Tower structures previously listed in the NRHP. The district is noteworthy for its collection of historic resources that collectively meet Criterion C at the local level in the area of Architecture. The district also possesses significance under Criterion A at the local level in the area of Community Planning and Development.

The recommended West Downtown Historic District contains a total of 300 primary resources, of which 239 (80%) are recommended as contributing to the historic district. Table 3-9 below provides an overview of the resources in the recommended West Downtown Historic District, including historic use or name, year built, and whether the resource is considered contributing or noncontributing to the proposed district.

The rough boundaries of the proposed district are as follows: the northernmost boundary runs along West 15th Street from Lamar Boulevard to San Antonio and Guadalupe Streets in the northeast, cuts south along Guadalupe and Colorado Streets on its eastern side, returns west along the rear parcel boundary of the properties on the south side of 9th Street and on the north side of 8th Street, and jogging south to encompass those properties not already listed in the Bremond Block Historic District near San Antonio Street and West 7th Street. The proposed district’s western boundary runs north along West Avenue from West 7th Street until West 8th Street, after which it loosely follows Shoal Creek and Lamar Boulevard to return to West 15th Street. Also see figures ii, iii and iv in the *Executive Summary* for maps depicting the recommended boundaries for the NRHP historic district.

Table 3-9. Resources by address within the proposed West Downtown NRHP District, including contributing/noncontributing status. (Note that secondary resources are included per NRHP guidelines.) Resources with an asterisk (*) are also individually NRHP-listed or eligible for individual NRHP listing.

¹ Although both the National Register program and the City of Austin historic program typically use a 50-year-old-age threshold, this survey adopted a 45-year cutoff, allowing for a 5-year window to ensure that the survey is not immediately obsolete when completed.

² For more information on the evaluation criteria used by HHM staff, please refer to the Research Design document developed prior to the initiation of field survey in Appendix E.

³ Date of 1890 refers to current configuration; possibly encompasses earlier building.

⁴ City of Austin Planning and Zoning Department, Local Historic Districts, accessed December 3, 2019, <http://www.austintexas.gov/department/local-historic-districts>.

⁵ City of Austin Planning and Zoning Department, Local Historic Districts.

⁶ Date refers to current configuration; possibly encompasses earlier building.

⁷ Date refers to current configuration; possibly encompasses earlier building.

⁸ Date refers to current configuration; possibly encompasses earlier building.

4 | Future Recommendations

The scope of this historic resources survey intends to present recommendations for informational purposes only. The recommendations also provide a basis for potential future planning and management projects. HHM’s recommended future action items are set forth in table 4-1 below, organized according to the responsible assignee and recommended timeframe.

Table 4-1. Future recommendations organized by action item, responsible assignee, and recommended timeframe.

#	Action Item	Responsible Assignee	Recommended Timeframe
1	Hold a public meeting to inform property owners about the process of zoning local landmarks and historic districts	City of Austin and OANA	October 2020
2	Conduct an informal survey to evaluate property-owner support for local historic district and/or local landmark zoning	OANA	November 2020
3	Apply for additional grant funding from the CLG program and Preservation Austin to complete local historic district and/or local landmark application(s) based on owner support	OANA	November 2020—April 2021
4	Complete and submit local historic district and/or local landmark application(s) based on owner support	OANA	May 2021—December 2021
5	File the survey report at the Austin History Center for public access	City of Austin	January 2022
6	Incorporate survey data into a citywide GIS database of historic resource surveys	City of Austin	February 2022
7	Update the <i>Historic Sites Atlas</i> to accurately reflect prior designations	Texas Historical Commission	February 2022
8	Work with the Travis County Historical Commission to create additional Official Texas Historical Markers conveying important stories within the district	OANA and Texas Historical Commission	January–December 2022
9	Apply for additional grant funding from the CLG program to survey and reevaluate the West 6th Street NRHP historic district	City of Austin	November 2022—April 2022
